Subject: City council Meeting minutes

I am a Lafayette resident & I like to be informed, but feel the city lacks in the information giving area.

What I personally would like to see is that the Lafayette website is updated more promptly with the city council meeting minutes. Currently, only those meetings through December 2006 have been posted. I am assuming that there was 1 in January & that the meeting minutes would have been approved at the February 8th meeting. They then should be posted the very next day for the people of the city to be able to read on the website. I have had to request that they be posted almost every single month for the last few years. It is a courtesy to the public to have them posted on a timely manner. The website also still states that the next meeting is February 8th. I know that that isn't true based on today's date. Misinformation....

Thanks,

Charles Muck
